

DOMETIC PML500C

Product description:

DOMETIC PML500C ELECTROPUMP FOR AIR CONDITIONING

The Dometic PML500C heavy-duty centrifugal pump provides a constant flow of cooling water through the air conditioning system for top refrigeration performance. The Dometic PML500C's glass fiber reinforced polypropylene head is equipped with magnetic drive rotors and is available with submersible or air cooled motors. The centrifugal electric pumps must be installed below the waterline. A vane through-hull and a seawater filter are recommended for correct operation. When there is only one electric pump for several air conditioning units, a separate connection is used. To complete the assembly, Dometic can provide fuel manifolds, hoses and joints. PML500Cs are larger in size and boast a bronze head with mechanical gasket and air-cooled anti-drip motors. For assured comfort on board.

TECHNICAL FEATURES OF THE DOMETIC PUMP PML500C

Product depth: 187.96 mm

Product height: 142.24 mm

Product width: 142.24 mm

Weight: 3.27kg

Prevalence: mt.4.26

Input voltage: (alternating current) 230 V

Input Frequency: 50/60 Hz

Are you looking for a product with different characteristics? HERE you can find the entire range of DOMETIC electric pumps and other specialized brands.

Product features:

Frequency (Hz): 50 / 60

Voltage (V): 230

Total head (m): 2.7

Length (mm): 187.96

Width (mm): 142.24

Height (mm): 142.24

Weight (Kg): 2.09
