

GROUNDING KIT 10 METRES

Product price:

90,00 € tax excluded

Product description:

Grounding consists of a series of measures designed to ensure that metal components share the same potential as the earth, preventing voltage differences between them or between them and the ground. This kit is designed to protect people from the risk of electrocution.

The kit includes the grounding rod and cable, available in different copper cross-sections. The cable is available in a 10-meter version.
