Product description:

Mosa GT20 PTO Generator 1500rpm 20kVA AVR

Mosa GT20 PTO Generator 1500rpm 20kVA AVR is a current generator designed to be powered by the power take-off (PTO) of a tractor, ideal for agricultural applications and in places where an electrical grid is not available. This generator offers an apparent power of 20 kVA (kilovolt-amperes) and an active power of 16 kW (kilowatts), making it suitable for powering a wide range of electrical equipment, including agricultural machinery, tools, and lighting.

The heart of the **Mosa GT20 PTO Generator 1500rpm 20kVA AVR** is the AVR (Automatic Voltage Regulator) voltage regulator, which ensures a stable and constant voltage, protecting connected equipment from voltage fluctuations. The generator is designed to operate at 1500 revolutions per minute, a common speed for tractor PTOs, and requires a tractor with a minimum power of 55 HP for optimal operation.

Technical Features **Mosa GT20 PTO Generator 1500rpm:**

Electrical Power PRP [kVA]: 20

Electrical Power PRP [kW]: 16

General switch size A: 32

Voltage regulator: AVR

Engine speed (rpm): 430

Tractor HP: 55

Weight (Kg): 235

Height (mm): 1027

Length (mm): 1148

Width (mm): 960
